The authors regret the loss of contact (no E-mails or Telephones) between them and the co-author M. I. Moussa that leads to removing his name in the accepted paper. For some special circumstances, the connection with Dr. Mahmoud Moussa was lost. In that period, we kept his name until the final stage of revision but we could not get his approval to the revised paper (major revisions) by any means and the paper was published without his name. However, we finally get contact with him (10 June 2017), he approved the paper, he accepted the changes we made in the paper, and we re-add his name as co-author to the paper.

The authors would like to apologise for any inconvenience caused.
